SEWAGE PUMPING STATIONS

7×10 ABOVE GROUND

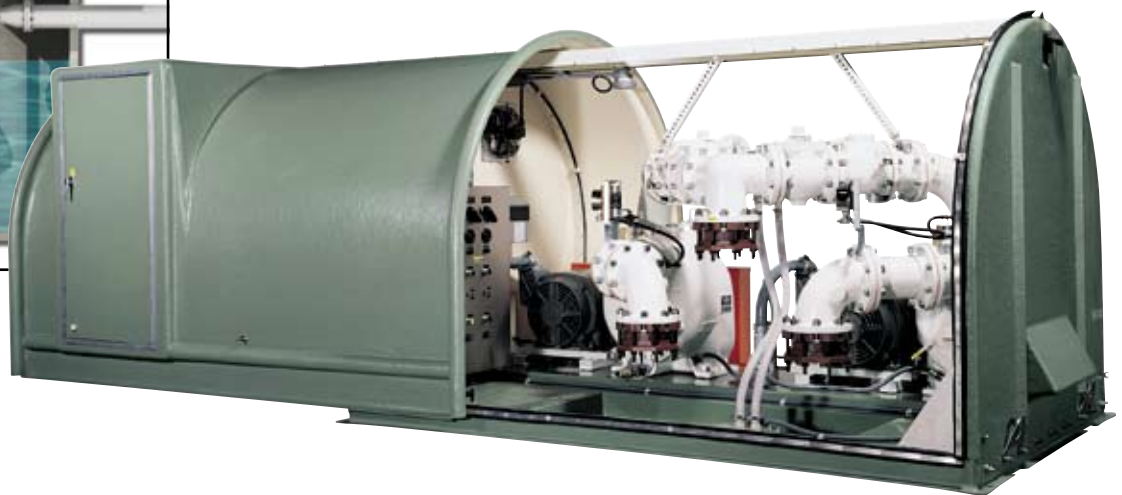

Gorman-Rupp's 7×10 Above-Ground packaged sewage lift station is a complete system with Super T Series® or Ultra V Series® self-priming pumps and is ready for immediate installation and hookup to power and piping.

The low silhouette and forest green color of the Quonset type fiberglass enclosure blends in with surrounding shrubbery and landscaping.

The fiberglass enclosure resists corrosion, mildew, fungus and mold. The two-way sliding cover provides easy access to all equipment for maintenance or service. The door is made with vandal-resistant hardware for added security. Depending on pump model, pumps are available in 2" to 8" sizes and capacities from 100 to 2100 GPM on single pump operation.

The fiberglass enclosure is resistant to corrosion, mildew, fungus, mold and vandalism.
