PRESSURE BOOSTER STATIONS

6' x 6' ABOVE GROUND STATION

The 6'x6' Above Ground Pressure Booster Station is an economical, compact, pre-engineered unit shipped complete from the factory. Just add power and connect piping.

Outside, the neat, trim, low silhouette fiberglass cover blends with the surroundings. Fiberglass enclosure resists corrosion and provides protection from weather. Hinged panels provide easy access to pumps and controls for maintenance and service. It includes vandal-resistant design for added security.

The fiberglass enclosure accommodates two pumps and motors sized to meet your requirements. The pumps are available up to 6" discharge, delivering flows to 750 GPM on single pump operation.
