

# PRESSURE BOOSTER STATIONS

## BASE-MOUNTED STATION

Base-Mounted Pump Stations are pre-engineered units with an extensive selection of pumps, motors, controls, piping and accessories. Gorman-Rupp has many standard designs for new installations, or we can custom design for existing installations with minimum hookup time.

Base-Mounted Pump Stations are available with a variety of pumps to match the system requirements, including: vertical in-line, horizontal end-suction or horizontal split-case. Flows from low to heavy require that any number of pumps may be used in conjunction with multiple size pumps. Pumps are available with a large range of flows and heads.

## MODULAR BOOSTER STATION

Our pre-engineered Modular Enclosures are convenient, affordable and durable. The modular enclosures can be expanded in increments of 2 feet. They range in size from 8'x8' to 24'x40'. Because they are pre-engineered, these units avoid the costs of designing and engineering a custom station housing.

These enclosures are made from corrosion- and mildew-resistant fiberglass which is impervious to caustic or acidic atmosphere and is UV resistant. White gelcoat interior adds easy maintenance and maximum light reflectability.

Strong and dependable, the enclosure will withstand winds up to 150 mph and has a snowload rating of 40 lbs. per square foot. R factors are 20+ (R10 is standard).

Lighting, heating and ventilation are installed, pre-wired and ready for immediate operation. Durable, 3-point stainless steel door lock is standard for added security.

Enclosures are available in green, gray, tan, white and blue (solid or pebble finish).
