

PRESSURE BOOSTER STATIONS

BELOW GROUND BOOSTER STATION

Gorman-Rupp's 7'6" Diameter Below Ground Pump Station features an inconspicuous, low silhouette entrance tube and is widely used in residential areas. The fiberglass enclosure accommodates an extensive selection of pumps, motors and accessories to meet your pumping needs. Pumps are available up to 6" sizes with flows up to 1300 GPM on single pump operation.

Gorman-Rupp also offers a 10' Diameter Below Ground Pump Station with identical features. This station accommodates up to 4 pumps (depending on size) with flows up to 1300 GPM on single pump operation.

Units are delivered right to the job site, ready to install and operate once simple piping and power connections are made.
